You discover that the performance of the query is slow.
Analysis of the query plan shows table scans where the

What should you do?

B. Use a FORCESEEK hint in the query.
C. Use a FORCESCAN hint in the query.
D. Update statistics on SalesOrderId on both tables.

statistics on a table or indexed view. By default, the query
optimizer already updates statistics as necessary to improve
the query plan; in some cases you can improve query performance
by using UPDATE STATISTICS or the stored procedure
sp_updatestats to update statistics more frequently than the
default updates.
