NEW QUESTION: 2The network administrator wants the ports on an EX series switch to allow both tagged and untagged frames to be forwarded. Tagged frames should be associated with their tagged VLAN, while untagged frames should be associated with a preconfigured VLAN. In this scenario, which statement is true?
A. An interface can be configured as an access port or a trunk port, but it cannot accept both tagged and untagged frames
B. The interface port mode should be configured as an access port with a VLAN ID, frames tflSreter the port with a VLAN tag already assigned will override the access port vlan id
C. The interface port mode should be configured as mixed mode to allow both trunk and access port modes, untagged frames will belong to the default VLAN configured on that post
D. The interface port mode should be configured as a trunk port, untagged fra
