NEW QUESTION: 1DRAG DROPYou have a SQL Server database server that contains a database named CustomerDB. CustomerDB is protected by using transparent data encryption (TDE) and a certificate named TDE_Cert.The server fails.You deploy a new server and restore all of the backups to a folder named C:\backups.You need to restore the database to the new server. Which three statements should you execute in sequence? To answer, move the appropriate statements from the list of statements to the answer area and arrange them in the correct order.**Answer:** Explanation:In order to perform a successful restore, we'll need the database master key in the master database in place and we'll need to restore the certificate used to encrypt the database, but we'll need to make sure we restore it with the private key. In checklist form:There's a
