**NEW QUESTION:** 1Why should batch files and scripts be stored in a protected area?**A.** Because of the need-to-know concept.**B.**

Because they cannot be accessed by operators.**C.** Because of the least privilege concept.**D.** Because they may contain credentials.**Answer: D**  
Explanation: Explanation/Reference: Because scripts contain credentials, they must be stored in a protected area and the transmission of the scripts must be dealt with carefully. Operators might need access to batch files and scripts. The least privilege concept requires that each subject in a system be granted the most restrictive set of privileges needed for the performance of authorized tasks. The need-to-know principle requires a user having necessity for access to, knowledge of, or possession of specific information required to perform official tasks or services.
