NEW QUESTION: 1. Which of the following is a cloud-based service that allows users to securely access their on-premises applications and data over the internet? A. Amazon Virtual Private Cloud (VPC) B. IPsec VPN C. Amazon Simple Storage Service (S3) D. Amazon IAM

Answer: B

Explanation: IPsec VPN is a cloud-based service that allows users to securely access their on-premises applications and data over the internet. Amazon Virtual Private Cloud (VPC) is a cloud-based service that allows users to create a private network in the AWS cloud. Amazon Simple Storage Service (S3) is a cloud-based service that allows users to store and retrieve data. Amazon IAM is a cloud-based service that allows users to manage access to AWS services and resources.

The country must be a two-letter ISO code. This can be set for synced users as well as managed users. Set-MsolUser -UserPrincipalName -UsageLocation "CA"
Note: Some organizations may want to create policies that limit access to Microsoft Office 365 services, depending on where the client resides. Active Directory Federation Services (AD FS) 2.0 provides a way for organizations to configure these types of policies. Office 365 customers using Single Sign-On (SSO) who require these policies can now use client access policy rules to restrict access based on the location of the computer or device that is making the request. Customers using Microsoft Online Services cloud User IDs cannot implement these restrictions at this time. Reference: Limiting Access to Office 365 Services Based on the Location of the Client

NEW QUESTION: 3You're running an application on-premises due to its dependency on non-x86 hardware and want to use AWS for data backup. Your backup application is only able to write to POSIX-compatible block-based storage. You have 140TB of data and would like to mount it as a single folder on your file server. Users must be able to access portions of this data while the backups are taking place. What backup solution would be most appropriate for this use case?
A. Configure your backup software to use S3 as the target for your data backups.
B. Use Storage Gateway and configure it to use Gateway Cached volumes.
C. Configure your backup software to use Glacier as the target for your data backups.
D. Use Storage Gateway and configure it to use Gateway Stored volumes.
Answer: B
