So that you can have a better performance when you attend the real exam, Not only do the HPE2-N69 practice materials perfect but we have considerate company that is willing to offer help 24/7.

**NEW QUESTION:** 1A FortiGate unit is configured with three Virtual Domains (VDOMs) as illustrated in the exhibit. Which of the following statements are true if the network administrator wants to route traffic between all the VDOMs? (Choose three.) **A.** As with all FortiGate unit interfaces, firewall policies must be in place for traffic to be allowed to pass through any interface, including inter-VDOM links. **B.** This configuration requires a router to be positioned between the FortiGate unit and the Internet for proper routing. **C.** The administrator can configure inter-VDOM links to avoid using external interfaces and routers. **D.** As each VDOM has an independent routing table, routing rules need to be set (for example, static routing, OSPF) in each VDOM to route traffic between VDOMs. **E.** Inter-VDOM

routing is automatically provided if all the subnets that need to be routed are locally attached.**Answer: A,C,D**

**NEW QUESTION: 2A.** On Order**B.** Sold**C.** Ordered**D.** Purchased**Answer: A**

**NEW QUESTION: 3**A company has an on-premises Microsoft SQL Server 2016 environment. All futures databases must meet the following requirements:  
\* The recovery model must be set to simple.  
\* The compatibility level must be set to SQL server 2014 (120).  
\* Your need to configure the SQL server 2016 environment.  
In the table below, identify the database you must modify for each requirement.**Answer:** Explanation:ExplanationModel: Change from full to simple Recovery ModelNewly created user databases use the same recovery model as the model database.The model database is used as the template for all databases created on an instance of SQL Server. Because tempdb is created every time SQL Server is started, the model database must always exist on a SQL Server system. The entire contents of the model database, including database options, are copied to the new database.  
Model: Set compatibility level to 120For all installations of SQL Server, the default compatibility level is set to the version of the Database Engine.Databases are set to this level unless the model database has a lower compatibility level.
