Actual & Real MB-820 Exam Question Every student always thinks where from he gets actual and real MB-820 question, through which he relaxes and satisfied.

**NEW QUESTION: 1**

A Provisioned IOPS volume must be at least 10 GB in size

**Answer: C** Explanation: A Provisioned IOPS volume must be at least 10 GB in size

<http://docs.amazonwebservices.com/AWSEC2/latest/UserGuide/Storage.html>

**NEW QUESTION: 2** Testlet: Litware, Inc You need to recommend a VPN solution for the new sales office. The solution must support the company's planned changes. What should you include in the recommendation? Exhibit: **A.** Internet Key Exchange version 2 (IKEv2) **B.** Point-to-Point Tunneling Protocol (PPTP) **C.** Layer 2 Tunneling Protocol (L2TP) **D.** Secure Socket Tunneling Protocol (SSTP) **Answer: D** Explanation:

<http://support.microsoft.com/kb/947032> SSTP is a new kind of Virtual Private Networking (VPN) tunnel that is available in

the Routing and Remote Access Server role in Windows Server 2008. SSTP allows for Point-to-Point Protocol (PPP) packets to be encapsulated over HTTP. This allows for a VPN connection to be more easily established through a firewall or through a NetworkAddress Translation (NAT) device. Also, this allows for a VPN connection to be established through an HTTP proxy device. The information in this article is more likely to apply to a small-sized or medium-sized organization. For these kinds of organizations, it is common to have one public IP address that is assigned to the external interface of a NAT router or of a gateway device. This article describes the following scenario: You have a Windows Server 2008-based Secure Socket Tunneling Protocol (SSTP)-based VPN server. The server is assigned a private IP address. The server is located on an internal network behind a NAT device.

**NEW QUESTION: 3** Case Study This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question. Overview Background Alpine Skihouse designs and manufactures skis and ski accessories. The corporate headquarters for the company is located in London. The company has a design office in Rome and sales offices in Paris, Los Angeles, and Boston. The design team director works in the Rome office. The company plans to implement Skype for Business Server 2015 to address their unified communications needs. The company currently has traditional PBX implementations in each office location and uses a dial-in conferencing system that is hosted on their internal PBX. The number of users in each office is shown in the following table: Remote connectivity to all corporate resources and services is provided by SSL virtual private network (VPN) only. The current

VPN solution tunnels all traffic to the office. Internet facing services cannot be reached directly from users' laptops when they are traveling. Problem statements

During the requirements gathering process for the Skype for Business deployment project, users reported the following issues:

- Users based in the United States report that they experience poor audio and video quality when they conduct meetings with users that are not located in the United States.
- Users based in the United States report that they experience poor audio and video quality when they conduct meetings and calls while they remotely connected to the office.

The design team director would like customers to be greeted in the Italian language when they use dial-in conferencing to join meetings. The sales team director organizes daily alignment meetings with local sales teams. He reports that there are issues with the quality of the audio and video.

Proposed solution

London

The following table shows the proposed London Skype for Business Server 2015 server architecture and IP addresses:

Rome

The following table shows the proposed Rome Skype for Business Server 2015 server architecture and IP addresses:

Los Angeles

The following table shows the proposed Los Angeles Skype for Business Server 2015 server architecture and IP address:

Requirements

Business requirements

The company has identified the following business requirements:

- Users must be able to access all Skype for Business services when they work remotely.
- The solution must support meetings with up to 10,000 users.
- The solution must be highly available, and must withstand the loss of a single component at any point in time with as little interruptions of service as possible.
- The language used by Skype for Business services must be localized wherever possible.

The leadership team in the Americas regions hosts an All Hands meeting for all employees four times per year. All employees are requested to join this meeting. You must not install any additional servers to support this requirement.

Technical requirements

The company has identified the following technical requirements:

- The SQL team has completed an upgrade of the entire SQL Server to the latest version. They require every SQL Server to use a SQL AlwaysOn Availability Group as the high availability (HA) option.
- There is no data center within the Boston site. You must use the secondary data center in London to minimize the impact to users in the event of a single-site disaster.
- Media traffic must only be encrypted once.

You must use the Skype for Business Management Shell

```
Invoke-CsComputerFailOverandInvoke-CsComputerFailBackcmdlets
```

to perform maintenance actions during daily operations. You must implement Domain Name System (DNS) load balancing wherever possible. You need to implement the dial-in conferencing request raised by the Design Director in Rome. What should you do?

- A.** Set the primary language of the Italian trunk configuration to Italian (Italy).
- B.** Associate the Italian dial plan with the correct dial-in conferencing region.
- C.** Set the primary language of the global conferencing policy to Italian (Italy).
- D.** Associate the global conferencing policy with the correct dial-in conferencing region.

**Answer : B**
