**NEW QUESTION:** 1BBB is a manufacturer that has been criticised in the financial press because it does not have a policy for sustainability. Which THREE of the following elements would be crucial to BBB successfully embedding sustainability into its activities?**A.** BBB should give all its staff training in sustainability.**B.** BBB's Board should make a commitment to

sustainability.**C.** BBB should spend at least 0.1% of its Net Profit on sustainability projects**D.** BBB should investigate the costs and benefits of establishing a sustainability department **E.** BBB should include sustainability targets in performance appraisal**F.** BBB should employ a new public relations consultancy**Answer: C,D,E**

**NEW QUESTION: 2**You are analyzing an ICF service in transaction SICF (Maintain Services). The ICF service is displayed in a blue font color. What does this color indicate? Please choose the correct answer.**A.** The ICF service is inactive. It has been deactivated explicitly.**B.** The ICF service is active. It has been activated explicitly.**C.** The ICF service is inactive. It has been switched from active to inactive because a superior ICF service has been deactivated.**D.** The ICF service is active. It has been switched from inactive to active because a subordinate ICF service has been activated.**Answer: C**

**NEW QUESTION: 3**Consider a menu entry containing both a submenu and a function definition. Which three statements are true? (Choose three.)**A.** If the function is executable, then the submenu would appear on the navigation tree.**B.** If the function is executable, then the submenu would not appear on the navigation tree, but will be available in function security tests.**C.** If the function is not executable, then it is treated as a tag for enforcing exclusion rules.**D.** If the function is not executable, then the submenu is treated as content to be executed by function.**E.** If the function is executable, then the submenu is treated as content to be executed by function.**Answer: B,C,E****Explanation:** If a menu entry has both a submenu and a function defined on the same line, then the behavior depends on whether or not the function is executable. **B:** If the function is not executable, then it is treated as a "tag" for enforcing exclusion rules, and the submenu on the same line is displayed in the navigation tree. **C, E:** If it is executable, then the submenu on the same line is treated as content to be rendered by the function. The submenu will not appear on a navigation tree, but will be available in function security tests (FND\_FUNCTION.TEST calls)**Note:** A function is considered executable if it can be executed directly from the current running user interface. For example, an Oracle E-Business Suite form using Oracle Forms is an executable function from within Oracle Forms, but not within the Self Service applications. **Reference:** Oracle E-Business Suite System Administrator's Guide - Security Menu Entries with a Submenu and Functions
