NEW QUESTION: 1What are the results returned by the if conditional statements in the Python language? (Multiple choice)**A. 0B. TrueC. nullD. FALSE****Answer: A,D**

NEW QUESTION: 2**A. Option DB. Option BC. Option AD. Option C****Answer: C**

NEW QUESTION: 3**HOTSPOT**Your company has a main office and two branch offices named Branch1 and Branch2. The main office contains a file server named Server1 that has BranchCache enabled. Branch1 contains a server named Server2 that is configured as a hosted cache server.All client computers run

Windows 8 Enterprise. All of the computers are joined to an Active Directory domain. The BranchCache settings of all the computers are configured as shown in the following exhibit. (Click the Exhibit button.) In the table below, identify the effective setting for the client computers in each branch office. Make one selection in each column. Each correct selection is worth one point.

Hot Area: **Answer:** Explanation: Explanation/Reference: Explanation: Both Server1 and Server2 will cache content for their local clients. Note: BranchCache has two modes of operation: Distributed cache mode: content cache at a branch office is distributed among client computers. Hosted cache mode: content cache at a branch office is hosted on one or more server computers called hosted cache servers.

NEW QUESTION: 4 What network information is required to set up any Cisco switches attached to a clustered Data ONTAP system? (Choose two.)

A. The appropriate number and type of cables and cable connectors for your switches are required. **B.** VLAN tags for each interface are required. **C.** Host names and IP addresses for each of the controllers and configured switches are required. **D.** All management ports configured for e0d or the service port (wrench icon) are required.

Answer: **A, C**

Explanation:

C: You need the following network information for all switch configurations: *Two or more IP subnet addresses for cluster network and management network traffic* Host names and IP addresses for each of the controllers and all applicable switches *Management network port assignments for your controller

D: To configure your cluster, you need the appropriate number and type of cables and cable connectors for your switches. Depending on the type of switch you are initially configuring, you need to connect to the switch console port with the included console cable.
