It's important to understand that the `getResults()` method makes an AJAX web service request. The `ShowRate()` method displays the stock rate from the web service response. You need to ensure that the `ShowRate()` method always displays the latest stock rate. Which code segment should you use?

A. Option B
B. Option C
C. Option D
D. Option A

Answer: D

Explanation:

With Amazon Kinesis Streams, you can have producers push data directly into an Amazon Kinesis stream. For example, you can submit system and application logs to Amazon Kinesis Streams and access the stream for processing within seconds. This prevents the log data from being lost if the front-end or application server fails, and reduces local log storage on the source.

Amazon Kinesis Streams provides accelerated data intake because you are not batching up the data on the servers before you submit it for intake.

NEW QUESTION: 2

You are developing an application that consumes an external web service that returns the latest stock rate.

The application has two methods:

The `getResults()` method makes an AJAX web service request

The `ShowRate()` method displays the stock rate from the web service response

You need to ensure that the `ShowRate()` method always displays the latest stock rate.

Which code segment should you use?

- A. Option B
- B. Option C
- C. Option D
- D. Option A

Answer: C

Explanation:

Explanation:

" always displays the latest stock rate ". Should use cache:
false
Note: cache (default: true, false for dataType 'script' and
'jsonp')
Type: Boolean
If set to false, it will force requested pages not to be cached
by the browser.
Reference: jQuery.ajax()
